### 'Checkpoint- friendly' laptop sleeve

Take your pick: modern suede with a handle on style by Skooba Skin or colorful cool in neoprene by Built. Both styles have what's important on the inside: material that allows a laptop to be scanned and viewed clearly without being removed from its case. The Transportation Security Administration gave the go ahead on a few different styles of laptop bags more than a year ago and they should become part of every business traveler's basic wardrobe. Both sleeves come in several sizes to fit a variety of laptops styles.

**AVAILABLE FROM:**

Skooba Skin, [CSNstores.com](http://CSNstores.com), \$22.99-\$29.99; Built Laptop Sleeve, [builtlaptop.com](http://builtlaptop.com), \$20-\$45.
