

Machine Quilting

Vol. II No. 2

UNLIMITED

Summer 2008

A Bright Idea

© 2008 Corinne Hammett

Whether you are a traditional quilter or have a passion for art quilting and landscapes; whether you hand-quilt, or quilt with a domestic, midarm or longarm machine, proper lighting is of primary importance in your studio. Clear, natural light can mean the difference between good color choices and great color choices in your quilting projects — both for fabric decisions and threads.

There are many good lamps available today. Here is an update of the brands and styles currently available, helping you to not only get the best lighting for your workspace, but protecting your eyesight as well. Visit the websites for more details on any of the brands shown here.

CSN Lighting

www.csnlighting.com

The **Grandrich** from CSN is sure to illuminate any work area making it the ideal lamp for the avid quilter. The Flex lamp represents a practical take on a truly modern design, resulting in full spectrum illumination.

These lamps are designed with the most advanced energy-saving technology, insuring Grandrich's sincere dedication to energy conservation. The Grandrich full-spectrum light provides the brightness, contrast and clarity to read longer and perform task work without eyestrain or headaches.

The **Quoizel** Focus task lamp from CSN helps illuminate your workspace with functional lighting solutions that are as beautiful as they are practical. This task lamp features a stylish, fully adjustable base and metal shade. The arm is bendable, allowing you to extend the length or shorten it whenever you please. The metal shade will provide the perfect amount of light for your work area. This task lamp allows you to see details easier than ever before, insuring that your quilts are of the finest quality. The Quoizel Focus comes in floor lamp styles also. Several different design styles are available.

The **Sunbox** Therapeutic Desk Lamp looks like an attractive desk lamp, but provides therapeutic full-spectrum lighting simulating natural sunlight. Bend the flexible neck down, and the SunBox DL makes a great full-spectrum, glare free task light for crafts and hobbies. The light delivers maximum effectiveness and user comfort by way of a high-speed, electronic ballast that eliminates any flicker and has very low heat.

There is a UV filter for eye and skin safety. Its lower level of blue spectrum prevents eyestrain. The Sunbox is also available in other styles.

The **Verilux** natural spectrum lamp utilizes 50 years of research to scientifically tune light for the eyes of readers, crafters and computer users. You can see fine details with ease as Verilux technologies optimize contrast and reduce flicker and glare. It has a unique clamp system that takes just 1.5" of space, and a fully adjustable steel gooseneck, putting the light just where you need it. The lamp includes an energy-saving Verilux Global Cooling 27 watt bulb that offers brightness equivalent to ordinary 100 watt or 150 watt bulbs with a high/low switch. The bulb lasts up to 10,000 hours. Several different attractive styles and colors are available.
