Mr. Impossible Chair

www.allmodern.com/kartell

The Mr. Impossible Chair is a hot, new stylized and streamlined chair designed by French Designer Philippe Starck, crafted by the Italian firm, Kartell, using a revolutionary new laser-construction method. Hollow, see-through legs will make you look like you're floating in the air! These super-durable, plastic stackable chairs come in funky, fun lounge colors like transparent black, yellow, red, purple, and orange. Pricey (\$500) but worth it.
